

Are you currently an operational volunteer firefighter within NSW RFS?

You are invited to participate in an anonymous online survey that explores risk perception amongst volunteer firefighters within the NSW RFS. It will look at the factors that influence risk perception in the hope of learning how you understand risk.

We are seeking responses from currently operational volunteer firefighters with the NSW Rural Fire Service who are 18 years of age or older. If you want to take part in this study, we will ask you to answer questions in an anonymous online survey exploring your experience of risk, as well as your training and operational experiences within NSW Rural Fire Service. Some demographic data will also be collected (e.g. age, years of service, etc).

Your responses will help to inform recommendations regarding ways to improve risk perception and safety amongst volunteer firefighters within the NSW RFS.

Participation is estimated to take less than 15 minutes. The survey will close on 15th March 2025.

If you wish to participate, please scan the QR code below or click on this link:
